Peculiar in its medicinal merit, Hood's Sarsaparilla secomplishes cures hitherto unknown.

Peculiar in strength and economy — Hood's Sarsaparilla is the only medicine of which can truly be said, "160 doses one dollar." Medicines in larger and smaller bottles require larger doses, and do not produce as good results as Hood's Sarsaparilla.

Peculiar in its "good name at home"—there is more of Hood's Sarsaparilla sold in Lowell, where it is made, than of all other blood purifiers.

A MOST LIBERAL and REMARKABLE ANNOUNCEMENT.

The "Consolidated" Controls

LOTS 50 BY 140 FEET.

The Lots are well located and are situated upon Streets 60 Feet Wide with a Rear Alley of 20 Feet. The location is admirable for Stores, Restaurants and Dwellings. Persons desiring to "buy or build," in order to educate their boys can do no better than buy one or more of these lots.

IT IS THE PURPOSE OF THE CONSOLIDATED TO OFFER, for the present only. and to guarantee that when the 800 Lots are sold, to erect upon some suitable portion of the property, sufficiently far removed from the residential portion, one modernly-built, well-equipped Cotton Factory, to cost \$100,000, and to supply the Cotton Factory with a CASH WORKING CAPITAL of \$25,000, making total outlay for

Making a return to each Purchaser of \$400 of the Property, of \$200, well invested in Good Industrial Enterprises.

For every dollar invested in West End Town Lots, adjoining the Trinity College property, the purchaser realizes 50 per cent. in First-Class Industrial Enterprises, which will enhance the value of his investment.

The "CONSOLIDATED" confidently believes that the above is the most liberal and at the same time the most legitimate offer that has come before the public. In fact the offer is so liberal that we do not hesitate to say that in our opinion, the opportunity will be promptly taken advantage of by those who have been waiting for the BEST, or persons desiring to secure first-class educational advantages for their Boys, on the most advantageous terms.

give employment to about 500 skilled mechanics, for whom 200 residences are now under contract of construction.

The business of manufacturing builders' hardware was started in Connecticut about fifty years ago and with less than one dozen hands. To-day about ten factories are in operation, including the Buffalo Lock-Manufacturing Company, and in the aggregate give employment to about 15,000 hands, and is constantly increasing in the number of hands, but not of factories, as it takes many years to start the business, all the patterns being made by hand. It is, therefore, in one sense a monopoly, and as the trade of American hardware extends to all parts of the world it is an absolutely safe and profitable one; nor has there been a failure in this line of business in the United States caused by the business itself in the fifty years that the trade has been established.

ness itself in the fifty years that the trade has been established.

Millions of dollars have been and are being made in the business now, and it is impossible for all the factories to fill their orders promptly. possible for all the factories to in their orders prompay.

Our reasons for removing to Richmond are that in the item of pig-iron alone we expect
to save from \$100 to \$150 per day, which item alone would pay about a 20 per cent.

But in addition to the saving on pig-iron, we can also save largely in the items of labor, lumber, fuel, and constant work all the year round without being prevented by climatic

Again: The shipping facilities in Richmond are unsurpassed, and as our foreign

trade is large we can ship direct from our factories in Richmond to Europe and once countries without changing bulk.

Again: Mechanics can live cheaper and save more money in Richmond than they can possibly do in the North, and as our mechanics will own their own homes it will enable East Richmond to have a good class of people, as our business alone will add to the population about 2,500 people, and as we expect to increase our force to 1,000 or 1,500 hands in a short time, most of them being skilled laborers from the North, it will help to make East Richmond a very desirable place for investment, and in our judgment will pay the investors a very large dividend on the investments. Very large sums are being made in inland towns, and we see no reason why a port of entry like Richmond should not do at loast as well and better.

The stock of THE RICHMOND HARDWARE COMPANY is issued in shares of \$100 The stock of THE RICHMOND HARDWARE COMPANY is issued in shares of \$100 ceach, and will be sold at par. Interest will commence from May 1st, and subscriptions will be received by the undersigned at their offices in Richmond any time till then, but not later, and the stock will be issued on and after that date. Interest at the rate of 6 per cent, will be paid, free of all taxes, semi-sanually at the office of the Company.

The preferred stockholders, while being guaranteed 6 per cent, per annum, also participate in the profits same as the common stock.
